**Exam 000-084: System x High Performance Servers Technical Support V3**

**Question: 1**

An automotive supplier maintains CAD workstations in widely separated plant locations, and these locations are interconnected by single 1.5Mb/second communication lines. A consultant has been asked to provide a solution that will allow back-ups to be centralized in one location and improve data recovery times. Which of the following questions should the consultant ask first to determine the best solution?

- A. What format are the CAD documents?
- B. Can the communication lines be upgraded to a higher service level economically?
- C. What are the current acceptable windows for back up and restore?
- D. Are the plants within line-of-sight to enable wireless communication?

**Answer: C**

**Question: 2**

A retail customer wants to deploy VMWare ESX on a scalable Intel system. They are considering IBM and Dell. Which of the following is an advantage IBM has over the competition?

- A. IBM provides the ability to expand up to 4 nodes.
- B. The IBM Modular Systems EXA chipset has extensions to provide better efficiency for the VMFS file system.
- C. IBM servers can address larger LUNs on SAN storage than Dell.
- D. IBM provided VMWare with the majority of their internal drivers for ESX.

**Answer: Pending**

**Question: 3**

A manufacturing customer purchased a new IBM Modular Systems x445. They already have a non-IBM industry standard rack with 14U of open space that being considered to house the new server. The rack houses an existing UPS unit for the entire rack. Which of the following questions is most important to ensure that the power in the datacenter environment is ready for the initial install?

- A. Have optional Fibre Channel and Ethernet switches been installed in the server?
- B. What is the available kVA value of the UPS?
- C. Are there sufficient empty socket outlets in the UPS?
- D. What is the impact on the power consumption of the data center cooling system?

**Answer: B**

**Question: 4**

A retail customer needs to install a database on a server. Which of the following statements describes how to modify the RAID configuration for optimal performance?

- A. Place both the database and transaction log on two logical drives in one RAID-10 array
- B. Place both the database and transaction log on two logical drives in one RAID-IE array.
- C. Place the database on a RAID-IE array and place the transaction log on a separate RAID-5 array
- D. Place the database on a RAID-5 array and place the transaction log on a separate RAID-1 array

**Answer: D**
