**Exam 000-210: IBM Storage Networking Solutions, Version 4**

**Question: 1**

A customer has a main office, including a main data center, and five small branch offices with little to no IT staff. The customer asks for a solution that will consolidate the backup infrastructure. Which solution provides the most reliable backup infrastructure?

- A. Purchase an N7600 for the main office and five N5300s for the branches, and include a one-to-many SnapMirror relationship with the branches
- B. Purchase five N5300s for the main office and five N5300s for the branches, and include a one-to-one SnapMirror relationship with the branches
- C. Purchase an N7600 and TS3500 for the main office, and five N5300s and five LTO drives for the branches; using TSM, backup each location and restore tapes at
- D. The main office
- E. Purchase five N5300s for the main office and five N5300s for the branches, and include a one-to-one SyncMirror relationship with the branches

**Answer: A**

**Question: 2**

A customer is implementing a synchronous replication solution for business critical data

a. To meet the Recovery Point Objective and the Recovery Time Objective, the peak bandwidth requirement was calculated to be 150MB/s. The customer has older switches that are only capable of 1Gb/s connections. Following the best practice guidelines for high availability, redundant design, how many long-distance connections should be planned?

- A. 2
- B. 3
- C. 4
- D. 5

**Answer: C**

**Question: 3**

Which feature provides a writable point-in-time image of a FlexVol volume?

- A. CloneVol
- B. FlexCopy
- C. FlexClone
- D. FlexShare

**Answer: C**

**Question: 4**

A customer has 24 servers, an eight-host port IBM DS5000, and eight single-port fabric-attached tape drives that are all SAN-attached. The customer needs tape connections and redundant disk connections. To follow best practice, what is the minimum number of HBA ports, per server, needed to implement a LAN-free backup solution?

- A. 1
- B. 2
- C. 3
- D. 4

**Answer: C**

**Question: 5**

A customer has two N series storage systems. N7000 filer is connected to Server 1, and N5000 filer is connected to Server 2. Which statement is correct?

- A. Server 1 and Server 2 can share storage via MultiStore.
- B. Server 1 and Server 2 can share storage via FlexVol.
- C. Server 1 can see Server 2 storage; however, Server 2 cannot see Server 1.
- D. Neither server can see the other server's storage.

**Answer: D**

**Question: 6**

A recent outage has mandated the need to back up a large NAS environment. Which protocol best aids in the backup process?

- A. NFS
- B. NDMP
- C. CIFS
- D. DMP

**Answer: B**

**Question: 7**

A customer wants to purchase a new SAN for their growing storage requirements. The customer currently has a limited budget, but would like to plan for something that will support future growth and replicate to a remote facility. Which SAN switch is the most cost-effective solution?

- A. IBM TotalStorage SAN140M
- B. IBM TotalStorage 2005-B16
- C. IBM TotalStorage MDS 9513
- D. IBM TotalStorage SAN32B-3

**Answer: A**

**Question: 8**

Which product allows a Storage Administrator to set storage utilization alerts for the DS8000, DS4800, SAN Volume Controller, and EMC DMX 2000?

- A. IBM Total Productivity Center for Fabric
- B. IBM Total Productivity Center for Disk
- C. IBM Total Productivity Center for Data
- D. IBM Total Productivity Center for Replication

**Answer: B**

**Question: 9**

Given the following: I) FCP II) iSCSI III) FCIP IV) TCP/IP Which types of storage networking does the N3700 support?

- A. I, III, IV
- B. II, III, IV
- C. I, II, IV
- D. I, II, III

**Answer: C**
