Exam 000-973: Power Systems Sales for the IBM I Operating System

Question:1

Which of the following is the earliest hardware model that supports IBM I V6.1?

- A. 810
- B. 820
- C. 520
- D. 525

Answer: A

Question:2

A prospect is concerned about maximizing return on IT investments. Which new features of IBM i V6.1 should be emphasized?

- A. Advanced virtualization, SAN Integration, Active Energy Manager.
- B. Single level storage, Object based architecture, Work Management features.
- C. Hypervisor LPARs, Solaris OS container support, DB2 for IBM i enhancements.
- D. TSM Encryption enhancements, Web-based systems management, COBOL improvements.

Answer: A

Question:3

Which of the following POWER6 servers include Optimum Care Service?

- A. 520 1-core
- B. 520 2-core
- C. 570 8-core
- D. 550 Enterprise Edition

Answer: C

Question:4

A Power 570 customer is considering relocating their system from their office building to a dedicated hosting center. Which of the following factors must be considered in making this decision?

- A. Power, 24x7 access, remote technical support, communication and network availability
- B. IBM hardware maintenance and Support Line, Software Maintenance agreement, Fix Central PTF Software accessibility
- C. Size of space available, number of remote workstations available, physical size of the data center, physical security
- D. Number of end users supported on the system, size of system memory, size of disk storage, peak network bandwidth required

Answer: A

Question:5

A customer with a i5/OS V5R4 is concerned about the security of the data on their full-system backup tapes. Which of the following solutions should be recommended to this customer?

- A. Tivoli Storage Manager
- B. Native i5/OS encryption function in V5R4
- C. Virtual tapes to encrypted independent ASP
- D. IBM i V6.1 - Encrypted Backup Enablement option

Answer: D

Question:6

What type of data resiliency does PowerHA iCluster use?

- A. Tape replication
- B. Logical replication
- C. OS-based replication
- D. Storage based replication

Answer: B

Question:7

A customer owns a POWER5 model 520 Value Edition, with no expansion units, running IBM i V6.1. An internal QIC tape is used for system backup. The customer needs additional processor capability. They are considering purchasing a POWER6 520, to replace the 520. Both systems are at the same software tier. Which of the following should be included in their TCO analysis?

- A. The new system warranty will reduce the overall hardware maintenance cost.

- B. New software licenses must be purchased for the IBM software currently on the 520.
- C. The existing backup media can be used to migrate to the new CPU internal tape drive.
- D. The existing disk drives can be moved directly to the new CPU, so no new disks are required.

Answer: A

Question:8

A customer is purchasing a 4-core Power 550. It will have three IBM I partitions sharing one core, and Linux using one core. One core will remain extra, for capacity on demand. What is the minimum number of IBM i licenses required?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: A

Question:9

A customer has a POWER5 520 Value Edition and a 5722-XW1 Client Access user based license at the P05 tier. What will happen when they migrate from the POWER5 520 to a POWER6 520?

- A. Client Access will remain at P05 user based.
- B. They will pay a P05 to P10 upgrade charge and convert to processor-based license.
- C. Client Access user license will convert to a processor-based license at no charge.
- D. They will pay a charge for 40 additional user licenses to bring them to P10 user license.

Answer: C

Question:10

Which of the following tools provides sizing and planning information when proposing IBM i on a blade installed in a BladeCenter H?

- A. iDoctor
- B. Disk Magic
- C. PM System i
- D. Performance Investigator

Answer: B

Question: 11

A customer with two model 820s and 14 older Windows servers has a requirement to refresh the servers due to growing workload demands. Which of the following provides the most cost-effective solution?

- A. Power 520 with IXAs to replace Windows servers
- B. Power 550 with iSCSI attached SAN and BladeCenter
- C. BladeCenter H with Blades for IBM i and Windows using VMWare
- D. BladeCenter S with Blades for IBM i and Windows using VMWare

Answer: D
